

OIL-INJECTED ROTARY SCREW COMPRESSORS

Atlas Copco

GA 7-75 VSD+ (7-75 kW/10-100 hp)

Atlas Copco

THE NEW REVOLUTIONARY COMPRESSOR FROM ATLAS COPCO

With its innovative vertical design, Atlas Copco's GA 7-75 VSD+ brings a game-changing revolution in the compressor industry. It offers Variable Speed Drive as standard, a compact motor and footprint thanks to its in-house design and iPM (Permanent Magnet) technology. The GA 7-75 VSD+ reduces energy consumption by on average 50%, with uptimes assured even in the harshest operational conditions. The GA 7-75 VSD+ is the air compressor of the future, designed in-house by Atlas Copco. It will set a new standard for years to come, positioning Atlas Copco as a leader in the compressed air industry.

Innovative

Atlas Copco has turned the compressed air industry on its head by redesigning the conventional layout of a typical air compressor. Instead of the normal space-taking horizontal design, the new GA 7-75 VSD+ has an upright, vertical, low footprint layout. This saves valuable floor and work space, eases maintenance access, accelerates manufacturing time, and reduces the total cost of ownership for all customers.

Efficient

- On average 15% lower Specific Energy Requirement (SER) than the current GA VSD models. Eco-efficient VSD+ reduces energy consumption by on average 50% compared to the current idling models.
- On top of energy savings, Free Air Delivery (FAD) increase of up to 12% over the range.
- Efficient fan motor below 37 kW (ERP 2015) reduces electricity consumption and noise levels.
- IE4 motor efficiency (iPM), outperforming IE3 efficiency levels.

Reliable

- Low maintenance: fewer components, increased uptime.
- Worry-free: the GA 7-75 VSD+ has been extensively field-tested.
- Based on unique combination of proven technologies and existing components, optimally brought together by Atlas Copco's unique experience and know-how.

Smart

- Elegant and revolutionary design.
- Extra compact footprint.
- Fewer components & few options: impressive list of standard features.
- Ecological design, efficient material usage.

INSIDE THE INNOVATIVE GA 7-37 VSD+

DRIVE TRAIN

- 1 Interior Permanent Magnet (IPM) motor**
- Very high efficiency: IE4.
 - Compact, customized design for optimal cooling by oil.
 - Designed in-house in Belgium.
 - IP66 vs. IP55.
 - No cooling air flow required.
 - Oil-lubricated motor bearing: no (re)grease(ing), increased uptime.

- 2 Element**
- Made by Atlas Copco.
 - Robust and silent.

- 3 Direct drive**
- Vertical design, fewer parts.
 - Oil-cooled, pressure-tight.
 - No gears or belts, no shaft seal.
 - Compact: footprint down 60%.

- 9 VSD+ cubicle**
- VSD+ superior to idling machines.
 - Electrical components remain cool, enhancing lifetime of components.
 - Dedicated drive for iPM technology motors.
 - 5% DC choke as standard.
 - Heat dissipation of inverter in separate compartment.

- 4 Innovative fan**
- Based on the newest technologies.
 - In compliance with ERP2015 efficiency.
 - Low noise levels.

- 5 Robust oil filter/separator**
- Integrated bypass valve with the oil filter.
 - Easy maintenance.

- 6 Electronic no-loss water drain**
- Included as standard.
 - Efficient removal of condensate without loss of compressed air.
 - Manual integrated bypass for effective condensate removal in case of power failure.

- 7 Elektronikon® controller**
- Integrated smart algorithms reduce system pressure and energy consumption.
 - Warning indications, maintenance scheduling and online status visualization.
 - Graphic display of key parameters (day, week, month) and 32 language settings.

- 8 Sentinel valve**
- No inlet arrestor.
 - No blow off losses.
 - Maintenance free.

INSIDE THE ROBUST GA 37-75 VSD+

DRIVETRAIN

1 Interior Permanent Magnet (IPM) motor

- Oil cooled motor.
- Optimal cooling for all speeds and ambient conditions.
- Designed in-house in Belgium.
- Oil-lubricated motor bearing: no (re)grease(ing), increased uptime.
- IP66: pressure tight.
- Permanent magnets.

2 New compressor element

- New improved rotor profile.
- Reduced pressure losses.
- Optimized in and outlet portals.

3 Direct drive

- Vertical design, less parts.
- Oil-cooled, pressure-tight.
- No gears or belts, no shaft seal.

4 Inlet filter

- Heavy duty.
- Maintenance every 4,000 hours.
- Pressure drop indicator.

11 VSD+ cubicle

- VSD+ superior to idling machines.
- Electrical components remain cool, enhancing lifetime of components.
- Dedicated drive for iPM technology motors.
- 5% DC choke as standard.
- Heat dissipation of inverter in separate compartment.

5 Radial fan

- Compact.
- Low noise level.
- High capacity for optimized cooling.

6 Classic cooler design

- Integrated water separation.
- Separate oil/air cooler.
- Easy access for maintenance.

7 Inverter

- Cool cubicle: no cooling fans needed.
- Fully enclosed: no dust ingress possible.
- External heatsink with separate cooling.

8 Integrated dryer

- Extra compact footprint.
- Refrigerant R410A.

9 Elektronikon® controller

- Integrated smart algorithms reduce system pressure and energy consumption.
- Monitoring features include warning indications, maintenance scheduling and online visualization of machine's condition.

10 Sentinel valve

- Optimizing the inlet flow of the air end.
- No blow off losses.
- Full aluminum design: maintenance free.

In almost every production environment, air demand fluctuates depending on different factors such as the time of the day, week or even month. Extensive measurements and studies of compressed air demand profiles show that many compressors have substantial variations in air demand.

VSD+ FOR 50% AVERAGE ENERGY SAVINGS

Atlas Copco's GA Variable Speed Drive+ (VSD+) technology closely matches the air demand by automatically adjusting the motor speed. Combined with the innovative design of the iPM (Permanent Magnet) motor, this results in average energy savings of 50% and an average cut of 37% in the lifecycle cost of a compressor. VSD+ works with permanent, in-house designed permanent magnet motors.

Why Atlas Copco Variable Speed Drive+ technology?

- On average 50% energy savings with an extensive flow range (20-100%).
- Integrated Elektronikon® Graphic controller controls the motor speed and high efficiency frequency inverter.
- No wasted idling times or blow-off losses during operation.
- Compressor can start/stop under full system pressure without the need to unload with special VSD+ motor.
- Eliminates peak current penalty during start-up.
- Minimizes system leakage due to a lower system pressure.
- EMC Compliance to directives (2004/108/EG).

* Compared to fixed speed compressors, based on measurement performed by an independent energy audit agency.

A STEP AHEAD IN MONITORING AND CONTROLS

The next-generation Elektronikon® operating system offers a wide variety of control and monitoring features that allow you to increase your compressor's efficiency and reliability. To maximize energy efficiency, the Elektronikon® controls the main drive motor and regulates system pressure within a predefined and narrow pressure band.

Dual pressure set point

Most production processes create fluctuating demands which, in turn, can create energy waste in low use periods. Using the Elektronikon®, you can manually or automatically create two different system pressure bands to optimize energy use and reduce costs.

Integrated Saver Cycles

Fan Saver Cycle reduces the energy consumption by switching off the fan in light load applications. Using an ambient sensor to monitor the required dew point suppression, the Elektronikon® starts and stops the dryer, minimizing energy use.

Week timer

An on-board clock enables timers to be set up to support any working scheme – per day, per week or completely customizable to your specific situation and needs.

EXCELLENCE IN INTEGRATED AIR QUALITY

Untreated compressed air contains moisture and aerosols which increase the risk of corrosion and compressed air system leaks. This can result in a damaged air system and contaminated end product. Maintenance costs can far exceed air treatment costs. Our compressors provide the clean, dry air that improves your system's reliability, avoids costly downtime and production delays, and safeguards the quality of your products.

Save money and the environment

Avoid risk of corrosion and system leaks, and ensure the effective safe disposal of untreated condensate – all within ISO 14001 standards.

On average 50% energy savings with newly designed integrated dryers

- Pressure dew point of 3°C (100% relative humidity at 20°C).
- Heat exchanger cross-flow technology with low pressure drop.
- Zero waste of compressed air thanks to no-loss condensate drain.
- Reduced operating costs.
- Environmentally-friendly characteristics; zero ozone depletion.
- Global warming potential has been reduced significantly by an average of 50% by reducing the amount of refrigerant in the new dryer.

SMARTLINK*: Data Monitoring Program

- Remote monitoring system that helps you optimize your compressed air system and save energy and costs.
- Provides a complete insight in your compressed air network.
- Anticipates on potential problems by warning you up-front.

* Unit performance measured according ISO 1217 ed. 4 2009, annex E, latest edition.
 ** Mean noise level measured at a distance of 1 m according to ISO 2151: 2004 using ISO 9614/2 (sound intensity method); tolerance 3 dB(A).

FAD is measured at the following effective working pressures:
 - 4 bar(e) (GA 18-37 VSD+)
 - 5.5 bar(e) (GA 7-15 VSD+)
 - 7 bar(e)
 - 9.5 bar(e)
 - 12.5 bar(e)
 Maximum working pressure: 13 bar(e) (188 psig)

Reference conditions:
 - Absolute inlet pressure 1 bar (14.5 psi).
 - Intake air temperature 20°C, 68°F.

Options

Energy recovery	DD+ filter
Dryer bypass	FoodGrade oil
Main switch	Elektronikon connectivity (SmartBox)
Freeze protection	UD+ filter
Heavy duty inlet filter	RXD oil
Pre-filter	ES4i, ES6i
Tropical thermostat	Transformer sales kit 200-230V / 500-575V
ITancillaries
